

Chapter 5

Stepping into the Solar System

Solar Suns are actually stars that are created along the conscious rays projected from the galactic sun at the center of the time matrix galaxy. They are the result of the consciousness of Source (Us) of the galactic sun stepping the energy of Source down in energy.

The individual replicated minds of Source cannot create a body form to put part of their consciousness into until reaching the stepped down level of a Solar Star – Sun as prior to that point in the creation process the energy of Source is to large in energy to embody into a smaller Light Body form.

As are all Star – Suns, a solar Star – Sun is a replicated collective mind of Source, stepping the energy of Source down from a higher level of energy. The solar star – suns step the energy of Source down through the 4 levels of the galactic plane, first in the parallel system and then in the system we currently find our self within following the conscious rays projected from the galactic collective Source mind.

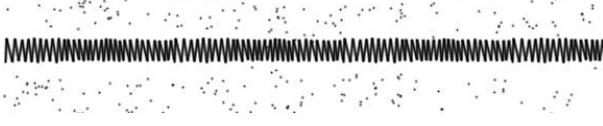

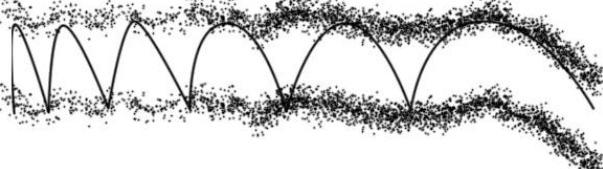

The encrypted coding for the solar star suns is “thought” held within the galactic collective Source mind. All of creation is “thought” held within the mind of Source. All star systems of the galactic plane are replicated minds of Source stepping the energy of Source down to lower levels of energy. All individual faces of Source express as Stars within the manifest realms of creation who project “rays of consciousness”.

All planetary holograms are created within/upon the rays of consciousness the individual faces of Source project within the solar plane. A solar plane is the Zero Point Lock sphere of a solar sun – star collective mind of Source.

Creation of Matter

The projected rays of consciousness are non-polarized energy which are projected into a sound field and the conscious energy of the rays vibrate and oscillate within their self which create vibration and oscillation within the sound field creating “*waves*” of conscious energy within the sound field.

The waves of vibrating and oscillating conscious energy *radiate* energy and the radiated energy creates “individual conscious light particles” which group together to create forms made of sound and light.

Higher Energy Sound Rays	Lower Energy Sound Rays
	
<p>Figure 16 Higher Energy Sound Waves</p> <ul style="list-style-type: none"> • Higher vibration. • Lower oscillation – waves are shorter. • Radiation is pushed further away from the ray, more spread out. • The radiation <i>particles</i> hold more energy and are <i>less</i> dense. • Creates “wave forms” we might think of as gases. • Creates “light forms” made of less dense units of energy with a higher level of radiation. 	<p>Figure 17 Lower Energy Sound Waves</p> <ul style="list-style-type: none"> • Lower vibration. • Higher oscillation – waves are longer. • Radiation is held closer to the ray, not as spread out because the lower energy of the ray does not push the radiation out from the ray as far as higher energy sound rays. • The radiation <i>particles</i> hold less energy and are <i>more</i> dense. • Creates light forms made of denser units of energy with a lower level of radiation.

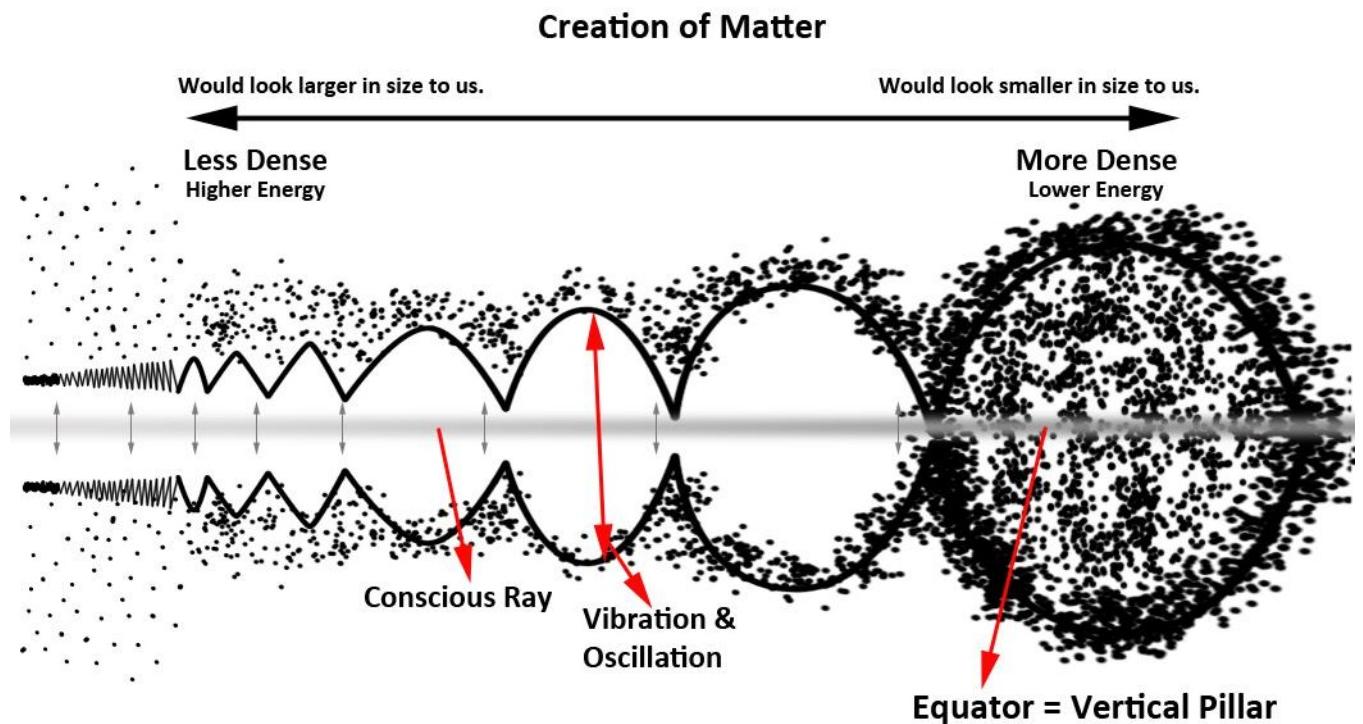

Figure 18 Creation of Matter

Figure 18 represents the creation of matter along a conscious ray projected from a Star Mind. The grey line (ray) in the center of the image is the same as the black waves but of course I cannot show you animation in a book so am illustrating it as such.

The conscious rays projected by a replicated conscious mind of Source (Star – Sun) spiral as they step the energy of Source down from higher to lower levels of energy. The conscious rays are projected into the sound and light field of the Zero Point Lock sphere of the mind (galactic & solar planes are zero point lock spheres of a replicated mind).

Solar Sun Minds are created along the conscious rays projected from the Galactic Sun collective mind to the boundary of the zero point lock sphere (galactic plane) stepping the energy of Source down along the conscious rays 12, 9, 6, 3, 12 then bending at the boundary of the zero point lock sphere and returning to the creation point of the Galactic Sun. This creates an expression of the Solar Star Sun within the 4 levels of the

galactic plane along the projected ray. Perhaps it is becoming easier for you to remember that every star system within the galactic plane is the same simply expressing at different levels of energy which makes each star system “unique” unto itself.

The projected rays create vibration and oscillation within the inaudible sound field which makes waves and the energy radiated from the sound field creates particles of Light Radiation. Science has named some of the Light Radiation things like cosmic waves, microwaves, ultraviolet light, x-rays, radio waves, long radio waves and of course visible light. But the truth of light is not understood within the earth system. We are getting closer to remembering how visible light is created.

All particles are light particles and all light particles are radiation. Radiation is the particles created by the vibration and oscillation of sound waves.

As we see in Figure 18, higher energy creates higher levels of radiation which are pushed further away from the ray so they are more spread out. This creates the seemingly empty space or void between star systems and celestial bodies of a star – solar system. It is what creates the illusion of space between things. The higher the level of radiation the larger the illusion of space.

As the energy of Source steps down in energy along the rays the decreasing energy creates lower and lower levels of radiation, particles that hold less energy within them and are denser making them more compacted. The denser units of light radiation particles group together per the encrypted thoughts of a conscious mind and create the illusion of matter manifest.

Matter manifest is the result of units of dense units of light created by lower energy waves of sound which group together to create “forms” made of sound and light. The “elements” that create the illusion of manifest matter are dense units of light created by lower energy waves of sound. A holographic reality field is made of dense units of sound and light which includes all biological matter of the hologram.

Thought creates waves within a sound field, a sound field vibrates and oscillates creating units of radiated light particles. Matter manifest is radiated light particles. Perhaps you are understanding even more how the thoughts of the masses are creating the earth hologram. Literally, it is the process of “singing” creation into being.
